

Fire and Rescue Training Institute

PRESENTS:

Emergency Vehicle Safety

Hours: 4

Min/Max Students: 15/24

Description:

This course includes an interactive lecture discussion utilizing a printed text and videotape. Topics covered in this course include: following distance and rate of closure, civilian drivers yield the right of way, intersection crossing procedures, red lights and sirens use and misuse and operator awareness.

Course Objectives:

The student, upon completion of this course, shall be able to:

1. Support any emergency service organization in improving safety in response driving.
2. Address the specific loss control objective of preventing emergency vehicle collisions.
3. Educate emergency service organization management and members as to the need to achieve this objective.
4. Provide emergency service organization management with the tools to make operations safer for their personnel, protect the public, and prevent damage to their equipment.
5. Provide a training course with practical strategies that can be implemented for the end user.

Request This Class for Training:

This course may be requested and hosted by an individual fire department or a group of fire departments for delivery anywhere in Missouri at any time of the year. Requests can be made by contacting the MU FRTI office. You can download a request form online @ <http://www.mufrti.org/download/student.shtml>
